

MightyMic C

SmartPhone/DSLR Condenser Microphone

- Works with MightyMic Pro wireless adapter for connection to a Smartphone
- Super-Cardioid design reduces unwanted sounds from the sides for less interference
- Condenser element for wide frequency response
- 3-position switch for phone, camera, or off
- No batteries required for operation
- XLR to 3.5mm plug connects to phone or camera
- Included windscreen helps reduce wind noise
- 4-Pin plug for direct connection to Smartphone headphone jacks or adapters
- Included hot shoe mount

The MightyMic C microphone is designed as a thin profile microphone for video and audio recording. Because of the wide frequency response condenser element it can be used for interviews, singing, and instrument recording. Plus, the super-cardioid pickup pattern is ideal for interviews to capture the subject while minimizing outside interference. It does not need any batteries as it is powered by the device. So you never get stuck doing that big recording only to find out the batteries are dead. It is compatible with the MightyMic Pro wireless smartphone adapter or just plug it into the headphone jack or lightning adapter of your device. Works with popular video apps like MoviePro or FilMic Pro so you can get great sound while recording video. For audio recording just open a recording App like Voice Memo or the optional MightyMic Pro Recorder App (IOS). It works with iPhone, iPad, and iPod Touch, and Android devices.

Package includes foam windscreen, microphone cable, hot shoe mount, and microphone.
