- Weight 21g, Size: 60 x 25 x 16 mm
- Includes charging cable and bag
- Custom, Patent Pending Design

The MightyMic Pro finally integrates a wireless smartphone microphone with Smartphone Apps for video and audio recording. Simply pair it to your device and then load the supported App. This is a high quality condenser wireless microphone with DSP noise reduction. There are 3 gain settings (High, Medium, Low), each incorporates Auto Gain Sensing (AGC) for maximum S/N performance. Smartphone pairing will allow a wireless range of up to 30 feet. Playback and Monitoring with integrated volume controls can be done directly through the MightyMic Pro's built-in headphone jack. The MightyMic Pro was developed to work with the optional MoviePro and Filmic Pro (IOS Only) or Cinema FV-5 (Android) video Apps so you can record wirelessly directly into the App. For audio recording just use any App that supports a wireless smartphone microphone such as MightyMic Pro Recorder. Using Filmic Pro you can use the MightyMic Pro and an Osmo Mobile gimbal mount as the same time. Using external microphones you can use our shotgun mic for film, our handheld mic for Interviews, and our lavalier mic for Recording. Check ampridge.com for other optional microphones and supported Apps. Package includes a USB charging cable, carrying pouch, and microphone.
